[^0]:    Since the start of FY9/16, the IFRS has been applied instead of the J-GAAP, which had been adopted until then.
    Revenue is disclosed as an IFRS-based indicator instead of traditional net sales, which are also disclosed as reference information on a voluntary basis. Revenue from the Advertising Agency Sales, which accounts for the majority of the Internet Marketing Business, shows only the posted net margins.
    Non-GAAP operating profit is disclosed on a voluntary basis to present actual business conditions more appropriately. Non-GAAP operating profit refers to the profit indicator used to assess ordinary business conditions after adjustments are made to IFRS-based operating profit pertaining to temporary factors such as the impairment losses, and gains or losses on the sales of fixed assets.

    Numbers in this material are rounded to the respective nearest unit.
