

Philosophy Deck

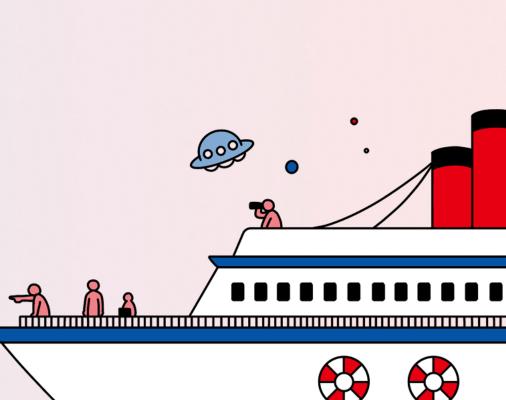

Since its founding in 1990, the Septeni Group has grown by embracing changes in the times and markets while continuously taking on new challenges.

With a renewed management structure in 2024, we entered our third entrepreneurial phase and are now taking steps toward even greater growth.

While we continue to enjoy change and create new value, there are certain values that we, as a group, want to hold on to and a future we want to achieve together.

This Philosophy Deck serves as a compass to help us grow together and forge a path to the future.

It is designed to support our individual journeys, helping to guide our daily actions and choices as we work toward the world we want to create.

Founded

Our Values Corporate Philosophy

Our Reason for Being and Our Mission

Mission

To inspire the world with entrepreneurship

What is our purpose?
What is our mission in society?

Our mission answers these questions.

We recognize each other's personality, leverage synergies of each individuality and expertise, continue enjoying and pursuing greater opportunities, and will empower people and industries through our business.

Mission

What Entrepreneurship Means to Us

The term entrepreneurship is generally translated as "entrepreneurial spirit," but in our group, each individual is encouraged to interpret the term in their own way, in addition to its general meaning.

In our group, entrepreneurship is not something practiced only by a select few managers or leaders.

It is something that each and every one of us discovers and puts into practice every day, in our own unique way.

Thinking about how to demonstrate my unique value to our clients and to society

The mindset needed to become the person I aspire to be

Embracing and leveraging our individuality

A commitment to pursuing
both personal growth and team
success

Vision Vision

Our Mid-to-Long-Term Vision and Our Desired Contribution to Society

Vision

To be a place where people are empowered to create a new era

To open the door to a "nameraka" future with creativity and technology

To make a complex world bright and simple through the power of digital

The Three Components of Our Vision

In a rapidly changing society and business environment, the Septeni Group established a new vision in 2022 to more clearly articulate our mid-to-long-term goals and our desired contribution to society, all in pursuit of our mission.

This vision was created by deeply exploring the ideals and values of the entire group and by carefully gathering input from various people, with a special focus on the voices of our employees.

The vision is composed of three phrases:

- The first phrase describes the environment (place) we, as the Septeni Group, aim to create.
- The second phrase represents our core competencies and the value we create from them.
- · The third phrase illustrates how we will positively impact society as a whole and "inspire the world."

Vision Illustrated

To help more people understand and connect with our vision, we've expressed it through illustrations. The images you see here are based on how our team members freely interpret the vision and what a world where our vision is realized looks like to them, each from their own unique perspective and sensibility.

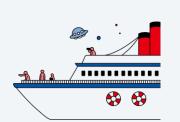

Whether it's a "stairway to a new world," a "launchpad for a nameraka future," or a "large ship representing our group"—the fact that we're not tied to one specific form, and that diverse interpretations and images can emerge and evolve, truly represents our potential.

We invite you to expand your own imagination as you connect with our vision.

Vision The first phrase

A large ship representing our group

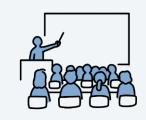

Each individual in our group

A great team

Learning from everyone

Comprehensive in-house training

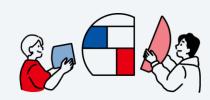

To be a place where people are empowered

to create a new era

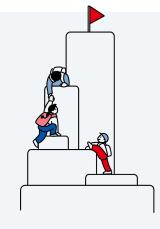

It expresses our desire to position our group as a place where people filled with a strong sense of ownership and entrepreneurial spirit grow through business and create a new era.

Nurturing the seeds of ideas

Turning ideas into reality as a team

Climbing a high mountain together with our members

New business pitch

Vision The second phrase

A door to a "nameraka" future

Next-generation mobility

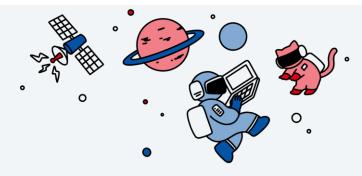

A high wall or a door to the future

Appreciating art

Hyper-humans

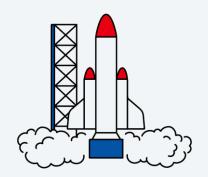

Remote work from space

To open the door to a "nameraka" future with creativity and technology

With creativity and technology—the very source of our business value—we aim to create a better future by broadening the "door to the future," walking through it with our stakeholders, and leading to mutual prosperity and shared success.

Stepping into the world beyond the door

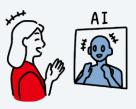

A launchpad to a "nameraka" future

The shopping experience of the future

Vision The third phrase

Global communication

Communication that transcends all barriers

Immersive metaverse experience through VR

To make a complex world bright and simple through the power of digital

It represents our commitment to taking on societal challenges while preserving what makes Septeni unique.

Our engineers

Our digital marketing experts

Looking to both the present and the future

Exploring with a "Hinerankai" mindset

Intentionally creating a simple environment

Values S

Our Identity and Aspirations

Values

Resilient, Caring, Exciting

Resilient

〈Stability, Grit, Courage〉

Always embracing an entrepreneurial spirit, choosing the path of greatest change to achieve results.

Caring

(Inclusiveness, Cooperation, Adaptability)

Systematizing our successes and growth opportunities and sharing them with everyone while embracing our diversity.

Exciting

(Unconventionality, Inspiration, Originality)

Taking on challenges that are far from easy, and enjoying the process as we find our own unique way to get them done.

Values

The Septeni Group has consistently grown by embracing a paradoxical cycle of "change" and "systematization," leveraging our strengths in vitality and diversity.

As our group continues to expand, a key challenge is how to keep this paradoxical state healthy.

To achieve this, each of us must embody both an "offensive" side (resilient) that embraces change, self-reliance, and challenge, and a "defensive" side (caring) that is open-minded, receptive, and genuinely good-natured.

Furthermore, we want to enjoy the process of balancing change and systematization, sometimes even moving beyond pure logic to tackle things with a cheerful, optimistic spirit.

Our core values of "Resilient, Caring, Exciting" were born from this very idea.

The concept behind these values is also reflected in the Septeni Group logo design.

(Japanese only)

Septeni Way

Actions and Principles that Embody "Resilient, Caring, Exciting" "

These principles were once known as the "Septeni Way," and they were cherished as the guiding light for the daily actions of every employee. While their position as a code of conduct has shifted within our current group philosophy, these principles still live within us, defining the Septeni Group's approach to action and decision-making. By applying these long-standing ideas to our daily activities, we embody the very values we cherish.

Speed

Better Rough and Ready Than Slow and Perfect.

We prioritize speed and aim for higher quality through a continuous process of trial and error.

Stretch

Aim High.

We relentlessly pursue innovation to clear ambitious goals, turning a constant accumulation of daily changes into remarkable growth.

Partnership

Grow Together.

By embracing a business owner's mindset, we spur each other on and generate synergy as "ONE SEPTENI," creating a better future together.

Fair & Open

Clear and Fair.

We foster sustainable trust with our stakeholders by building a fair and open environment and relationship.

Passion

Maintain Passion.

We believe that passion enhances our abilities and serves as the staying power to produce results. Through our own growth, we will drive our group's growth and contribute to society.

Free & Rule

Discipline and Freedom.

We choose what is right over what is profitable, always maintaining a high sense of ethics. We pursue our work with passion and integrity, balancing discipline with enjoyment.

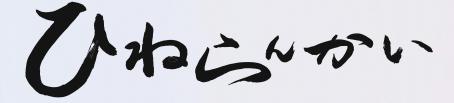

Creed

Septeni Group's DNA

Creed

Hinerankai (Think outside the box)

This is our culture of constant ingenuity.

As an independent company, the Septeni Group started with nothing—no capital, no human resources, no business. Our greatest asset was the collective wisdom and ideas of our employees.

We will never forget our founding spirit. We will continue to embrace it as our group's DNA and use change as a catalyst for our future growth.

Philosophy

With our creed of "Hinerankai" and our values of "Resilient, Caring, Exciting," we work to achieve our vision, our mid-to-long-term North Star, to realize our mission of "To inspire the world with entrepreneurship."

05

The Connection Between Group Philosophy and Individual Company Philosophies

05 Philosophy

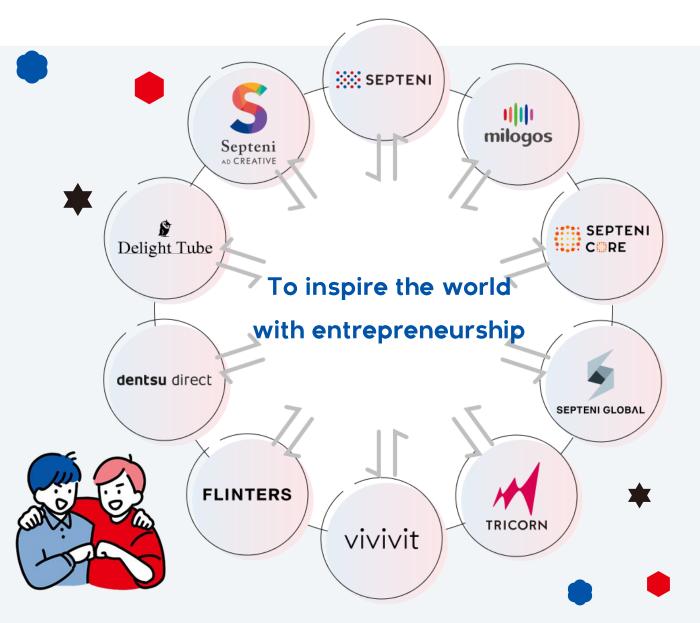

Each Septeni Group company has its own philosophy, stated in its own words, to define its specific mission, future goals, and core values.

This individual philosophy acts as a compass, allowing each company to leverage its unique strengths and create synergy through collaboration.

While we respect the diversity and autonomy of each company, our ultimate shared purpose is articulated in our group philosophy. This approach has fostered the unique sense of unity that defines the Septeni Group.

By continuously challenging ourselves to live up to our own company's philosophy, each one of us contributes to realizing the group philosophy and helps build the future of the entire Septeni Group.

Philosophy

The Septeni Group will continue to evolve and take on new challenges.

Along this journey, there will be times when we feel lost or uncertain. There may even be moments when we feel we must shoulder the burden of entrepreneurship all on our own.

But we are never alone.

We have teammates who are growing with us and a path we can walk together.

By supporting each other, honing our individual skills, and combining our unique strengths, we can generate the power needed to achieve great things.

So, take this Philosophy Deck as your guide, step forward with confidence, and let's create a new future that inspires the world.

Realizing Our Group Philosophy

I make a conscious effort to enjoy working with my teammates, even when we're flexibly handling difficult projects. I constantly consider and practice what is best for my own growth. I proactively take on new challenges and work to build relationships where we can mutually inspire each other. I prioritize working with greetings and smiles

I actively support challenges and provide guidance to foster growth.

I am committed to being proactive and taking full ownership of my work.

I always prioritize greetings and gratitude.

I broaden my perspective and seek out "wonderful things" beyond the world of ad design, using them to influence my work.

Are you, in your own unique way,
taking concrete action
to realize both your personal philosophy
and that of the Septeni Group?

Through education and management, I help create an environment where each person can best demonstrate their value.

I am always driven by a desire to delight and impress our clients.

I strive to create an environment in my field where people who will create a new era can grow.

I am committed to documenting even the tasks thought to be mine alone, ensuring a smooth handoff.

When an idea comes to mind, I reflect it in my work or find ways to simplify my workflow.

I maintain an entrepreneurial spirit and continuously take on new challenges without hesitation. I am in a daily process of trial and error as I manage my team for the first time.

I've realized that guiding our members' growth while achieving my/my team's mission is the core of value creation for the entire company.
